

HERFIX D-4

Concentrated fixer

Specifications	TYPICAL VALUE
Solubility in water	Soluble
Density (g/cm ³)	1.02 x 0.01
pH	5.5 x 0.5
Nature	Synthetic polymer solution

HERFIX D-4 is a concentrated fixer that is applied by airbrush, forming a thin film that dries quickly allowing a subsequent application in the enamel line. It is used both on raw enamel and on each of the screen prints. It is prepared with water in a recommended dilution of 3% - 8% fixer in water.

ADVANTAGES OF HERFIX D-4

- 1.- The HERFIX D-4 is a product that allows the application of successive screenprints in very little space, as it fixes the anterior layer and dries quickly.
- 2.- This product does not seal airbrush nozzles and is easily cleaned with water.
- 3.- It is non-toxic, not flammable.
