

FIXOIL RC-8011

Screen vehicle for application in the rotating gravure machine (photogravure).

Specifications	TYPICAL VALUE
Solubility in water	Soluble
Ford Cup Viscosity No. 4, 15oC(s)	14
Density (g/cm ³)	1.08 x 0.01

FIXOIL RC-8011 is an oil to obtain usable pastes in rotating gravure machines (photogravure). It is usually filled with 80/100 parts of the color mixture to obtain pastes with densities between 1.48-1.52 gr/ml. With a viscosity between 25-30 sec. C.F. No. 4.

FIXOIL RC-8011 ADVANTAGES

1.- The pastes with this formulation are easily discharged from the roller incisions and the deposited points are fixed, obtaining a correct definition.

2.- The pastes remain stable during storage and are easily recovered with the gentle stirring of the roller rubbing.

3.- It is non-toxic, not flammable.

The product remains stable for one year if stored between 5 and 40oC.
