

HERSIL D-3535

Silicone emulsion

Specifications	TYPICAL VALUE
Ionic character	Non-ionic
Solids content (%)	35 x 1
pH	6 x 1
Color	Blancor

HERSIL D-3535 is applied to the surface of leather, wood and other materials, providing a soft and smooth touch with a good degree of water-repellent.

HERSIL D-3535 is non-ionic in nature and has no stability problems in strongly anionic finishing systems.

What is outlined in this form is the result of our experience and we offer it for information but without implying any commitment on our part.

The results in each particular application should be tested by the direct managers of the specific formulation.
