

# HERSIL 5050 COLOURLESS

Dimethylpolysylxane emulsion

Specifications	TYPICAL VALUE
Ioninc character	Non-ionic
Solids content (%)	50 x 1
Color	White

Hersil 5050 colorless finds applications as an additive in the formulation of footwear maintenance products and polishers for furniture and leather. Its application confers a very soft and smooth touch with a good degree of water resistance and non-stickness.

What is outlined in this form is the result of our experience and we offer it for information but without implying any commitment on our part.

The results in each particular application should be tested by the direct managers of the specific formulation.
