

HERLIMP XWE

Shampoo with wax for manual car washing

Specifications	TYPICAL VALUE
Color	Transparent
Solids content (%)	20 x 1
Miscibility with water	Total
Viscosity (cP)	< 50

HERLIMP XWE is a special high concentration shampoo for manual cleaning of all types of car surfaces. It contains self-brighting wax that revives body colors and protects paint from external atmospheric agents. Its powerful cleaning action effectively and effortlessly removes dirt from the body and bumpers.

Once washed, it creates a water-repellent protective layer that repels water and prevents dirt from sticking for longer.

Features

- * Cleans and waxes in the same operation giving exceptional body gloss.
- * High concentration for numerous washes (25 washes/litre). A small dose is enough to clean a complete vehicle.
- * Clean thoroughly quickly respecting body colors and all surfaces.
- * 100% biodegradable. Environmentally friendly.
- * It is recommended to use in dilutions from 1:2 to 1:5 parts in preferably decalcified water.

What is outlined in this form is the result of our experience and we offer it for information but without implying any commitment on our part.

The results in each particular application should be tested by the direct managers of the specific formulation.
