

FORMHER LS-215

Formulated for soils

Specifications	TYPICAL VALUE
Character	Anonyonic / Non-ionic
Solids content (%)	25 x 1
Ph	9 x 1
Color	Translucent cream

Formher LS-215 is usable in floor maintenance and cleaning.

In all formulations it is necessary to incorporate suitable anti-bacterial preservative and we recommend using for dilution decalcified water, better than hard water, for greater stability.

What is outlined in this form is the result of our experience and we offer it for information but without implying any commitment on our part.

The results in each particular application should be tested by the direct managers of the specific formulation.
