

HERNAUBA N-8030

Natural waxemulsion.

| Specifications | TYPICAL VALUE |
|----------------------|---------------|
| Ionic character | Non-ionic |
| Solids content (%) | 30 x 1 |
| pH | 8 x 1 |
| Brightness | Extraordinary |
| Water dispersibility | Total |

HERNAUBA N-8030 is a natural wax emulsion with particle size of less than 1μ , which gives it excellent gloss characteristics, along with a film hardness that make it a base material for self-opening preparations.

Complies with EC Regulation 1935-2004 for substances used for coating surfaces that may be in contact with food.

FDA compliant: CFR 175.300, 176.170, 176.180, 178.3850.
