

HERNAUBA A-25

Annonic emulsion of carnauba wax.

Specifications	TYPICAL VALUE
Ionic character	Anion
Solids content (%)	25 x 1
pH	9.5 x 1
Brightness	Extraordinary
Color	Black / Dark Brown
Water dispersibility	Total

HERNAUBA A-25 is a carnauba wax emulsion with particle size of less than 0.1 μ , which gives it excellent gloss characteristics, along with a film hardness that make it a base material for self-bright preparations.

Complies with EC Regulation 1935-2004 for substances used for coating surfaces that may be in contact with food.

FDA compliant: CFR 175.300, 176.170, 176.180, 178.3850.
