

HERNAUBA N-40

Carnauba wax emulsion

Specifications	TYPICAL VALUE
Ionic character	Non-ionic
Solids content (%)	40 x 1
pH	4 - 7
Brightness	Extraordinary
Color	Light grey
Water dispersibility	Total

HERNAUBA N-40 is an emulsion of natural waxes with particle size of less than 1 μ , which gives it excellent characteristics of brightness, together with a film hardness that make it a base material for self-opening preparations.

In its exceptionally large field of uses it stands out:

- Floor polishes.
- Treatment of skins and tanned in general.
